Guide for choosing Soils & Amendments

for improving all types of soil conditions in outdoor landscapes

Bagged Products:

Best Used for:

Information:

Ultra Outdoor Planting Mix

Trees & Shrubs

Good water penetration with water-holding crystals and supports quick rooting.

Gardens

Contains a extended-release fertilizer that feeds plants for 3-4 months.

Flowers & Veggies

Can be used as only soil in beds or mixed with existing soil.

Premium Topsoil

Trees & Shrubs

Loosens clay soil by separating the stiff structure.

Lawns

Makes sandy soil more compact and permits it to hold more moisture.

Can be used as only soil in beds or mixed with existing soil.

Premium Natural & Organic Compost Blend

Trees & Shrubs

Great for adding nutrients and moisture to existing soil.

Gardens

Should be mixed with topsoil or other soil items for planting.

Flowers & Veggies

Adds organic matter to soil for better growth and development.

Natural & Organic Potting Mix

Potted Plants

Contains a mix of selected peat humus, sand, Canadian sphagnum peat moss, and perlite.

Hanging Baskets

A ready-to-use formula that promotes healthy plant growth
